Personal Statement

I am a professional UX designer with over five years of experience. Proficient in industry standard design tools like Figma. I design products that communicate and connect effectively with users. I can translate any raw idea into an organized form and shape. Working together with the technical and business teams to create solutions, one of my strengths is the ability to effectively translate and visualize the expectations of both internal and external stakeholders.

Core skills

Product Design
Collaboration

Prototyping
UX Design

Interaction / UI Design
Visual Design
